## Professional Summary

Backend Software Engineer with 4+ years of professional experience specializing in PHP, Laravel, and scalable backend application development. Skilled in designing and developing secure, high-performance RESTful APIs, integrating payment gateways and third-party services, and building database-driven applications.

Experienced with MySQL, PostgreSQL, Redis, queues, caching, and background job processing to optimize system performance and scalability. Passionate about writing clean, maintainable code, following industry best practices, and delivering reliable software solutions that meet business requirements.

---

## Technical Skills

- **Backend:** PHP, Laravel, Node.js, MySQL, PostgreSQL, MongoDB, RESTful APIs, GraphQL, Eloquent ORM, Authentication (JWT, Sanctum, Passport), Queues & Jobs, Event-Driven Architecture, Database Design & Optimization, Query Optimization, Caching (Redis), File Storage (Local, S3), Task Scheduling (Laravel Scheduler), API Design, Third-Party API Integration, Webhooks
  - **Frontend:** Vue.js, JavaScript (ES6+), jQuery, HTML5, CSS3, Bootstrap, Tailwind CSS, React.js (Basic), Next.js (Basic), TypeScript (Basic)
  - **Version Control & Dev Tools:** Git, GitHub, PhpStorm, VS Code, Postman, Docker, Composer, NPM
  - **Deployment & Server Management:** Shared Hosting, cPanel, VPS, Linux (Basic), Apache, Nginx
  - **Soft Skills:** Problem Solving, Team Collaboration, Communication, Time Management, Adaptability
- 

## Professional Experience

### Software Engineer

Bug-Finder — Uttara, Dhaka, Bangladesh

September 2022 – Present

- Joined as a Software Engineering Intern and was promoted to **Backend Developer** based on technical performance and consistent contributions.
- Designed, developed, and maintained scalable backend applications using **PHP, Laravel, MySQL, PostgreSQL, and Redis**, with a focus on performance, security, and maintainability.
- Built and integrated **RESTful APIs** for web applications and integrated multiple third-party services, including payment gateways, authentication systems, and external APIs.
- Implemented **Laravel Queues, Jobs, Scheduler, Events, and Redis caching** to optimize background processing and improve application performance.
- Enhanced complex business modules such as **dynamic forms, role-based access control (RBAC), subscription management, order management, and real time notification systems**.
- Created and optimized database schemas, wrote efficient queries, managed transactions, and applied row-level locking to ensure data consistency in concurrent operations.
- Collaborated with frontend developers using **Vue.js, Inertia.js, JavaScript, and Bootstrap** to deliver responsive and user-friendly applications.
- Participated in Git-based team workflows, code reviews, debugging, deployment, and production support while working in an Agile development environment.
- Integrated multiple payment gateways, including **Stripe** and other third-party payment providers, enabling secure payment processing, subscription billing, and webhook-based transaction handling.

## WordPress Theme Designer

Khalid IT — Jessore, Khulna, Bangladesh

October 2020 – March 2021

- Customized responsive WordPress themes to enhance website appearance and improve user experience.
- Participated in sprint planning, code reviews, and production deployments, helping deliver software releases on schedule.
- Conducted lead generation and managed accurate data entry, supporting sales and marketing efforts with reliable client information.
- Improved and maintained multiple client websites, ensuring consistent design and functionality.

## Web Design Intern

Future Track IT — Mirpur, Dhaka, Bangladesh

May 2019 – September 2019

- Assisted in designing and developing responsive websites and WordPress themes using HTML, CSS, and JavaScript.
- Customized WordPress themes to meet client requirements, ensuring cross-browser compatibility and mobile responsiveness.
- Updated website content and performed accurate data entry, maintaining organized and functional sites.
- Collaborated with senior developers to implement interactive features, troubleshoot issues, and optimize user experience.

---

## Education

### Computer Science and Engineering (CSE)

Northern University Bangladesh (NUB)

Graduation Year: 2026

### Diploma in Computer Engineering (CE)

Ahsanullah Institute of Technical and Vocational Education and Training (AITVET)

Passing Year: 2019

---

## Professional Development & Certifications

- Web Development, Web Coder IT, 2022
- Mobile Game and Application, Bangladesh ICT Division, 2018

---

## Languages

- English (Fluent)
- Bengali (Native)
